5 colors

BS-5C COLOR ID BIT TRAY

a smart bit box

The BS-5C makes sure your operator selects the correct bit and the correct tightening program thanks to color identification. It can be used in two ways: it either tells the operator which bit to use to perform the assembly operation, or it selects the tightening program associated with this bit when the operator takes a tightening bit.

Its self-learning configuration does not require machining or factory setting like most bit boxes on the market. Keying is assured in an absolute way by color recognition.

- ✓ **No default**
Bit coding by color recognition
- ✓ **Easy setting**
Self-learning of bit color on each slot position, choice of program assignment for each bit, several languages available
- ✓ **Bit's capacity**
Suitable for all types of bits and sockets: halfmoon, hex. 1/4", (max. Ø 19 mm, length 49 to 250 mm)
- ✓ **Ergonomics**
Horizontal or vertical mounting, angle adjustment, visible bit footprint, rings leds around slots for easy selection, bright OLED display

Made in France

DOGA design office and manufacturing are located in Paris area. Our machining and assembly specialists produce in our plant high quality products shipped all around the world.

Involved in the industry renewal

By joining this industry network, we affirm our position as an industry committed to innovation and ready to promote the excellence of French manufacturing.

Certified quality

From design to commissioning, DOGA guarantees the quality of equipment and services according to ISO 9001: 2015 certification.
